

AIR-SYNC

Built to balance all four tires at once, the AirSync System streamlines inflation and deflation for faster transitions from trail to pavement. Designed for off-road recovery and precision air management, it delivers equalized pressure across all tires—saving time, reducing guesswork, and keeping your rig ready to move.

Features & Benefits

- Simultaneous four-tire inflation and deflation for maximum efficiency
- Automatic pressure equalization for consistent tire balance
- Preset pressure control with automatic shutoff for accuracy
- Heavy-duty, abrasion-resistant hoses and fittings
- Optimized for use with high-output compressors and vehicle air systems
- Compact, organized layout for quick setup and teardown
- Ideal for trucks, SUVs, UTVs, and overland rigs
